MSE vs MAPE

Mean Squared Error (MSE) vs Mean Absolute Percentage Error (MAPE)

- $MSE = \frac{1}{N} \sum_{t=1}^N (Y_t - \hat{Y}_t)^2$ -> Scale을 반영하지 못함.

- $MAPE = \frac{100}{N} \sum_{t=1}^N \left| \frac{Y_t - \hat{Y}_t}{Y_{t+1}} \right|$ -> Y_t (일일 확진자 수)가 작으면 과대추정.

where Y_t is the number of daily cases, \hat{Y}_t is the predicted value for Y_t ,

MSSE

Mean Squared Scaled Error (MSSE)

$$-MSSE = \frac{1}{N} \sum_{t=1}^N \left(\frac{Y_t - \hat{Y}_t}{\bar{Y}} \right)^2$$

where Y_t is the number of daily cases , \hat{Y}_t is the predicted value for Y_t ,

\bar{Y} is the mean of $\{Y_t\}$ for $t = 1, \dots, N$

Japan / Logistic

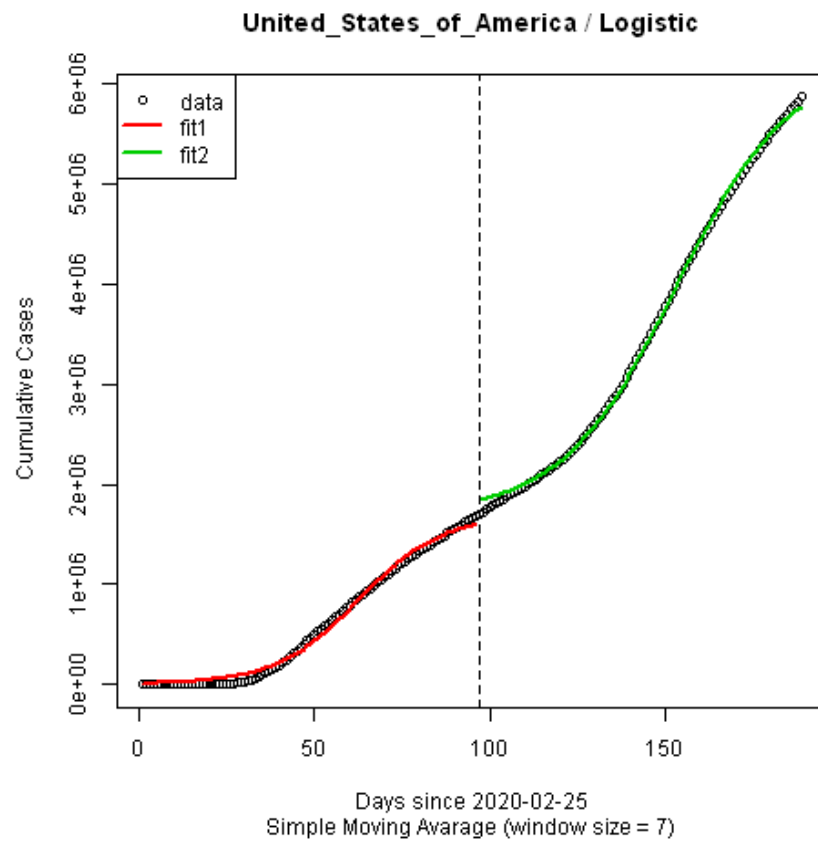

MSSE = 0.0472408101620523

Not fitted

결론

- $MMSE = \frac{1}{N} \sum_{t=1}^N \left(\frac{Y_t - \hat{Y}_t}{\bar{Y}} \right)^2$ 기준 0.4 이상인 국가들 제외
 - Logistic : Aruba / **Equatorial_Guinea** / **Kyrgyzstan** / **Rwanda** / Thailand
 - Gompertz : China / **Equatorial_Guinea** / **Kyrgyzstan** / **Rwanda** / Zambia
